### Comments of INVESCO ^ 景順基金經理評論

Equities in developed markets fell during the quarter as a backdrop of poor economic data and renewed nervousness about the financial sector's outlook soured investor sentiment. In addition, growth fears escalated as the degree of scepticism about efforts to boost the global economy increased. However, following a series of fresh measures aimed at shoring up economies and further efforts to stabilise the banking system, stocks strengthened in March. The late rally boosted IT stocks in particular on encouraging signs that the pace of economic deterioration was beginning to moderate, especially in the US. The MSCI World IT (US\$) index rose by 0.8%, a favourable contrast to other equity asset classes. Over the longer term, we continue to see positive trends in the IT sector as we believe it is supported by three key themes that are secular in nature and not dependent on a short-term catalyst. These themes are globalisation, consumerisation and proliferation. With the first, productivity gains are supporting increased use of technology in international markets. With the second, demand for technology is being driven by the consumer, regardless of age or gender. With the final theme, technology continues to penetrate products for all types, ranging from cars and industrial controls, to sports equipment and alternative energy.

季內，已發展國家股市下挫，主要由於經濟數據疲弱，加上市場再度憂慮金融業的前景，削弱投資情緒。此外，投資者質疑環球當局採取救市措施的成效，增添盈利增長的憂慮。然而，當局對出新一輪的救市措施，旨在振興經濟及穩定銀行體系，帶動股市在3月份反彈。股市回升，加上經濟惡化的情況，特別是在美國，開始出現緩和的跡象，刺激科技股上揚。摩根士丹利世界資訊科技(美元)指數上升0.8%，優於其他股票資產類別。長遠而言，我們繼續看好資訊科技股的走勢，因為獲三項重要的長期主題所支持，這些主題不受短期的因素影響，包括全球化、消費者化及迅速擴展。全球化方面，生產力上升支持國際市場增加科技的應用。消費者化方面，不論年齡或性別，消費者均帶動對科技的需求。迅速擴展方面，科技的應用已擴散至各類型的產品，由汽車及工業控制設備以至體育用品及另類能源。

#### Remarks 註:
